If you make this project please share with us by using **#grannypansythrow**

MATERIALS:

Eco-cotton double knit
(100% cotton, DK, 50 grams)

2 balls each of Orchid, Seashell, Pickled Ginger, Mint, Watershed

10 balls Mist (for joining and border)

3.5mm Crochet Hook.

Darning needle.

NOTES: 5 colours at 2 balls per colour = 10 balls, which makes 160 hexagons.

Joining and 2 rows of dc border = 8 balls

PATTERN:

Flower Hexagon centre:

Round 1: Magic ring, Ch3, tc, ch2, Repeat (2tc tog, ch2)5 times, Join round with slip stitch to top of first ch3 and end off colour.

Round 2: Join new colour and work 5tc into every 2ch-space. Join round with slip stitch to top of first tc and end off colour.

Round 3: With new colour htc into each of the 5tc stitches of the row below, Make 1dtc spike stitch into the top of each petal (the 2tctog stitch from round 1) pulling up a long loop to same height as htc's, Join round with slip stitch to top of first htc and end off colour.

Joining:

Round 4:Joining (10 across x 13 down)

Use one colour for all joining rounds (mist).

For first hexagon complete this final round. For subsequent hexagons, use this round to join as you go.

*Into the top of any dtc spike stitch make 2tc, ch3, 2tc, ch1 (makes a hexagon corner), skip a stitch and tc into next stitch, ch1, skip stitch and tc into next stitch, ch 1 **Repeat * to ** around first hexagon only.

On all the rest of the joining hexagons continueas follows:

Join at corners making ch1, slst into corner of first hexagon alongside, ch1 and continue along the side per above, Repeat *-* to join to second corner of same hexagon alongside and then continue as per above to complete the round. When joining a third hexagon to two already joined then slip stitch around the join between the two already joined hexagons (not into the actual chain space).

Border – Colour Mist

Into each stitch work a double crochet.

Where two hexagons meet, make 1 dc into each of the two joining corners

Into each corner of the hexagon (where it is not joined to another hexagon) make 2dc, 2 ch, 2 dc

Work two rows around the blanket to complete the border.
